Specialist metal fabricators and consultants

SPECIALIST METAL FABRICATORS AND CONSULTANTS

Pioneering innovative steel and alloy fabrication techniques, m-tec specialises in the fusion of form and function to forge unique architectural and sculptural installations for an increasingly diverse range of clients.

Consultation is at the core of our operation. Each commission presents new challenges and offers fresh opportunities for the development of imaginative solutions to complex conceptual proposals.

Unsurpassed expertise informs everything we do. m-tec's peerless workforce comprises first-rate designers, project managers and technicians whose remit is to accomplish each project with skill, professionalism and originality.

Services we offer:

- / Consultation
- / Design
- / Structural calculations
- / Laser cutting
- / Folding and bending
- / Fabrication
- / Coded welding
- / Expertise on most metals and alloys
- / Painting and metal finishes
- / Delivery and installation

Market Sectors:

- / Urban regeneration
- / Master planning
- / Bespoke architectural metalwork
- / From concept to completion

CONSULTATION FABRICATION INSTALLATION

Technology underpins our entire operation. Investment in computerised laser-cutting and bending technology and 3D drawing capabilities gives our workforce the edge.

Six hundred highly-skilled personnel operating from a 500,000sq-ft design and fabrication facility allow us to deliver the highest standards – and to our agreed schedule.
